PREFATORY.

In preparing this Catalogue it has been our endeavor to present in a new form a convenient hand-book which may be of service to our customers in selecting books for purchase. It embraces two thousand three hundred of the principal American and British books on Medical and allied topics, which, with the kind assistance of Dr. Thomas C. Minor, of this city, have been classified under three hundred and eighty separate heads, with numerous cross references. In this division we have given the title, we think with sufficient fullness, the size, place of publication, date of the last edition, and price of each work. In the second division are given the same books with short titles, arranged by the author's names, with the pages on which the full titles may be found. Thus, the physician or student can find, without difficulty, what books there are on any special subject, and also the writings of any particular author.

It has been our aim to make this a catalogue only of such works as are in print and readily obtainable. Some books may be included in it, however, which are out of print, from the fact that some publishers have the habit of keeping the titles of their publications on their catalogues after their stock of them has been exhausted. In cases where there is a probability of such books being reprinted, we have inserted the old title, leaving the price blank or putting it within parentheses.

The American publications are fully represented in our stock, and can be promptly supplied. All new books are received as soon as issued.

The British publications are not all kept in stock, but we are ordering weekly and can supply any work in print in about seven weeks from the date of the order. We have experienced agents in London and Paris, who give special attention to the collection of old, rare works, and such modern works as are out of print and scarce.

We have given also a very full list of American and British Periodicals, Hospital Reports, Transactions of Societies, etc., which we hope will be found useful. Physicians and Librarians desirous of keeping up their Serials, will do well to furnish us with a list of them so that the new volumes may be sent to them promptly on publication without further orders.

It is our intention to issue, from time to time, supplements of new books and lists of second-hand books, which will be sent free to all who desire them and will send us their address.

Those who favor us with their patronage may rely in having their orders carefully filled on the most liberal terms. Letters of inquiry will meet with prompt attention.

BOCK-STEGER'S ANATOMICAL MODELS OF THE HUMAN BODY. With Explanations in English or German.

I. Preparations Represented in an Enlarged Size.

1. THE HEART, the anterior wall of which can be removed, disclosing the four cavities of the heart, with their openings and valves. \$8 00
2. THE EYEBALL, the upper portion of which (containing a microscopical representation of the layers of the retina) is to be taken off, when the cornea and iris, the lens and the vitreous body may be taken out. 6 50
3. THE ORGAN OF HEARING, containing in separate parts the membrana tympani, the ossicles of the tympanum, the labyrinth, and the half-opened cochlea. 8 00
4. THE SKIN, showing, in a transverse section, the organs of perspiration, a hair with its follicles, the pulp, the sebaceous glands, and tactile corpuscles. 4 00
5. THE TEETH, the anterior portion of the left maxillary bone being removed, for the purpose of showing their development and structure. 4 00

II. Preparations of Natural Size.

6. THE BRAIN, in four different aspects: *A.* View of *Upper Portion*, \$3.50.—*B.* View of *Lower Portion* (basis of cerebral nerves), \$3.50.—*C.* *Perpendicular Section* along the median line, \$3.50.—*D.* *Transverse Section*, showing the cavities, \$3.50.
7. THE HEAD. Three views: *A.* Head with *Muscles, Nerves, and Blood Vessels* of one side, \$6.00.—*B.* Head with *Cavities of the Skull and Eye, Upper and Lower Jaw*, \$6.00.—*C.* *Perpendicular Section* of the head, showing the brain, cavities of the mouth and nose, larynx and pharynx divided along the median line, \$6.00.
8. THE LUNGS, with the heart. *A.* *Anterior* view of the lungs and heart. The pericardium opened, the anterior portion of the left lung is removed, showing the *Bronchial Ramifications*, \$4.00.—*B.* *Posterior* view of the lungs and heart, with a representation of the bronchial rami, air cells, and blood vessels, \$4.00.
9. THE ORGANS OF RESPIRATION. *Air-passages, Lungs, Heart.* The anterior part of both lungs with the heart can be taken off, laying open the ramifications of the wind-pipe within the lungs. The connection of the pulmonary blood vessels with the heart, \$12.00.
10. THE LARYNX (viewed anteriorly and posteriorly): *A.* *Anterior* aspect with the hyoidean os and the thyroid gland, \$2.50.—*B.* *Posterior* aspect with the glottis and vocal cords, \$2.50.—*C.* Larynx in connection with the *Tongue and Pharynx*, which latter is opened from behind, \$3.50.
11. THE JOINTS, partially opened, with their bones and ligaments: *A.* *Arm-joint* of the shoulder, opened, \$2.50.—*B.* *Elbow-joint*, *a.* anterior view, \$2.00.—*C.* *Elbow-joint*, *b.* lateral view, \$2.00.—*D.* *Wrist-joints and Hand*, \$3.00.—*E.* *Hip-joint*, \$2.50.—*F.* *Knee-joint*, \$2.50.—*G.* *Ankle-joints and Foot*, \$4.00.

Anatomy, Human—Continued.

Bock-Steger's Models—Continued.

12. THE TRUNK (Torso) with the viscera of chest and abdomen laid open, \$30.00.
 13. THE HUMAN SKULL AND BRAINS, the various parts of which can be taken out, \$12.00.
 14. THE LARYNX PHANTOM. Mask of the face, mouth open, for the purpose of practicing with the laryngoscope, \$10.00.

A complete set of 28 models, packing included, \$150.00.

For single models, packing-boxes charged at cost.

BOURGERY & JACOB'S ANATOMICAL PLATES. Twenty in set. Figure, three feet long, beautifully colored; mounted on rollers. Price per set, \$50.00. Sold separately, each, 3 00.

OSTEOLOGY AND SYNDESMOLOGY.—Plate I. Anterior plane. *Right* Side: The Dry Bones. *Left* Side: The bones clothed with their ligaments. Plate II. Posterior plane. The same arrangement.

MYOLOGY AND APONEUROLOGY.—Plate III. Anterior plane. *Right* Side: Superficial Muscles. *Left* Side: Superficial Aponeuroses. Plate IV. Anterior plane. *Right* Side: Muscles of the second layer. *Left* Side: Muscles of the third layer. Plate V. Posterior plane. *Right* Side: Superficial muscles. *Left* Side: Superficial aponeuroses. Plate VI. Posterior plane. Second and third layer of muscles. Plate VII. Lateral plane. Superficial and deep muscles. Muscles of the os hyoides. Plate VIII. Diaphragm. Interior of the trunk, muscles of the lower jaw, velum palati, and of the pharynx.

ANGIOLOGY.—Heart, lungs, arteries, veins, and lymphatics. On the different figures are indicated the points at which compression on the ligature of the vessels is effected, and in regard to the veins in particular, the proper points for performing venesection. Plate IX. Interior of the trunk. Heart, lungs, and their envelopes. Large vessels. Plate X. Vessels of the thorax and abdomen, azygos vessels, cerebral and spinal venous sinuses. Plate XI. Anterior plane. Subcutaneous vein, and deep vessels. Plate XII. Posterior plane. Superficial veins, and deep vessels. Plate XIII. Lateral plane. Partial figures, internal maxillary and internal carotid vessels, etc. Plate XIV. Lymphatic vessels.

NEUROLOGY.—Plate XV. Anterior plane. Encephalic nerves. Nerves of the extremities. Plate XVI. Posterior plane. Studies of the ganglions and their nerves. Studies of the fifth and seventh cerebral pairs. Plate XVII. Brain, spinal marrow, and envelopes. Organs of the senses. Larynx.

DIGESTIVE APPARATUS.—Plate XVIII. Alimentary canal, stomach, intestines, chyliferous vessels, peritoneum. Plate XIX. Stomach, liver, pancreas, spleen, kidneys, supra-renal capsules, bladder. Abdominal venous system. Great Sympathetic and pneumogastric nerves. Plate XX. Complete study of the perineum in both sexes. Male and female organs of reproduction. Embryotomy.

BRAUNE (W.) Atlas of Topographical Anatomy after Plane Sections of Frozen Bodies. Containing 35 full-page photographic plates, with 46 wood-cuts in the text. Translated by E. Bellamy. 4to. Philadelphia, 1877. Cloth, \$12.00; half morocco, 14 00

ROBERT CLARKE & CO.

PUBLISH

THE POCKET CASE-RECORD AND PRESCRIPTION BLANK BOOK, WITH VISITING LIST. $3\frac{1}{2} \times 7\frac{1}{2}$ in. 176 pp. Flexible Cloth. Weight 4 ounces. 35 cts. each; \$3.50 per doz.

This book supplies a convenient method of keeping copies of prescriptions and notes of cases in private practice; it is so arranged that this can be done at the bedside, with the least possible expenditure of time. There are spaces for noting the name of patient, date of visit, address, age, physique, diagnosis, condition of pulse, temperature, respiration, tongue, urine, and stools; also, for copying the prescription and a full-sized blank for the apothecary. The writing of prescriptions twice, in this way, certainly prevents errors in prescriptions which have more than once caused immediate death.

In addition, there are VISITING LIST Blanks, which may be commenced at any day of the month or week, and will accommodate the largest practice. There is also a calendar, a list of poisons and antidotes, an obstetric calendar, and a list of doses of peculiarly active drugs.

Send thirty-five cents for a sample.

PHYSICIANS will do well to call the attention of their Druggist to these books, as they can be furnished at a moderate price, like ordinary prescription paper, with the druggist's name printed on the back of each prescription blank, and then supplied by the druggist free to the physician, resulting in mutual advantage.

APOTHECARIES furnishing physicians with prescription blanks will find the Poeket Case-Record the most desirable form, while they are the *cheapest in the market*, the amount of work being considered. They are sold, with the apothecaries' card printed *on the back* of each presercription blank at the following

PRICES:—12 books, \$5.00; 25 books, \$9.00; 50 books, \$16.50; 100 books, \$30.00. For physician's name *in addition* to apothecaries' card, \$1.50 for each name.

ALL ORDERS SHOULD BE ACCOMPANIED BY A REMITTANCE, EITHER BY POSTAL ORDER, DRAFT, OR REGISTERED LETTER.

Packages for apothecaries will, as a rule, be sent by express unless otherwise ordered, and *C. O. D. if not paid for*. Orders for 12 copies sent by mail *only when paid for in advance*, and *55 cents added to prepay postage*.

OFFICE CASE RECORD AND PRESCRIPTION BLANK BOOK.
8 x 11 in. pp. 250. Half sheep. \$1.50.

This book will be found almost indispensable to those who do a large office business. It is so arranged that one may keep complete notes of the condition of each patient, as to pulse, temperature, respiration, tongue, urine, stools, age, weight, and physique, together with a copy of the prescription. There is also a R blank for the apothecary, which is torn off through a perforated margin. There are nearly 400 prescription blanks in each book.

PHYSICIAN'S CASE-BOOK WITH DIAGRAMS. $8\frac{1}{2} \times 14$ in.
pp. 300. Half sheep. \$4.00.

This handsome book is designed for the accurate and systematic record of important cases. It is provided with printed headings for name, disease, age, sex, weight, race, occupation, married or not, physique, residence, present and former, family history, and history and diary of the case. For each case there is also a well-arranged chart, intersected by alternate red and blue lines, for projecting a graphic view of the temperature and pulse range, morning and evening, nearer perfect than any heretofore designed. In addition, there are spaces for noting respirations, morning and evening, and a series of four outline figures of the body, presenting anterior, posterior, and lateral views, and divided into appropriate regions, with normal positions of pelvic viscera, so that any one may easily map out the location of lesions of the lungs and liver, abdominal tumors, malpositions of the uterus, etc. There is also an index.

MEDICAL CHART OF TEMPERATURE, PULSE, RESPIRATION, AND REGIONS. 50 cents per doz.; \$3.00 per hundred.
Special rates for large quantities.

These are sheets of paper, legal case size, printed on one side with headings as in the Case-Book, and on the other containing a temperature and pulse chart and outline figures, as described in the Case-Book. They are intended to be left at the patient's bedside, and filled up at the time of the visit, or *in hospitals*, placed at the head of the patient's bed, so that *they may easily be filled by the house physician*. They are arranged so that after use they can be bound in series—all the pneumonia, typhoid fevers, etc., together.

REVOLVING BOOK CASE.

The case is graceful, neat, durable, and useful. The article as represented in the cut, is square, 22 inches in diameter each way, taking up no more room on the floor than a chair. They are made of ash and trimmed with black walnut, finished in good style, so as to make a handsome piece of furniture. The cut represents a No. 3, which has three spaces, and whose entire height is 5 feet, 2 inches.

These cases revolve on an entire view and novel principle, the pressure of less than a pound will bring either side to view.

ROBERT CLARKE & CO'S

PORTABLE LIBRARY CASE.

"It is cheap, neat, substantial, and for convenience can not be excelled."

This cut represents our PORTABLE LIBRARY CASE as it appears when set up, being neatly and substantially made of black walnut, oil finish (or ash if preferred). It is constructed in three separate sections, nicely put together and held firmly in place by dowel pins, a neat molding covering the joints.

The sections are of convenient size for handling when filled with books, and can be easily lifted apart, thus enabling one person to move them from one room to another, or, in case of fire, an entire library can, in a few moments, be carried to a place of safety without disturbing the books.

Any one wishing to add to their library or to furnish a new one, will find that this Case excels all others for convenience, cheapness, or durability. It will hold about one hundred and fifty ordinary octavo volumes.

Professional men will find it especially adapted to their use, and we feel confident will fully appreciate its advantages.
